

## Ecuaciones con Números que Faltan (B)

Llene los espacios en blanco.

$$\underline{\quad} \times 3 = 24$$

$$7 \times \underline{\quad} = 42$$

$$7 \times \underline{\quad} = 56$$

$$6 \times \underline{\quad} = 18$$

$$\underline{\quad} \times 2 = 16$$

$$\underline{\quad} \times 8 = 40$$

$$3 \times \underline{\quad} = 9$$

$$1 \times \underline{\quad} = 1$$

$$8 \times \underline{\quad} = 8$$

$$4 \times \underline{\quad} = 32$$

$$3 \times \underline{\quad} = 27$$

$$\underline{\quad} \times 9 = 63$$

$$\underline{\quad} \times 9 = 81$$

$$8 \times \underline{\quad} = 16$$

$$4 \times \underline{\quad} = 20$$

$$\underline{\quad} \times 3 = 9$$

$$\underline{\quad} \times 8 = 24$$

$$\underline{\quad} \times 9 = 54$$

$$4 \times \underline{\quad} = 16$$

$$\underline{\quad} \times 7 = 35$$

$$6 \times \underline{\quad} = 30$$

$$4 \times \underline{\quad} = 32$$

$$8 \times \underline{\quad} = 56$$

$$\underline{\quad} \times 9 = 36$$

$$5 \times \underline{\quad} = 40$$

$$\underline{\quad} \times 7 = 21$$

$$5 \times \underline{\quad} = 30$$

$$9 \times \underline{\quad} = 27$$

$$\underline{\quad} \times 7 = 63$$

$$9 \times \underline{\quad} = 9$$

$$9 \times \underline{\quad} = 45$$

$$4 \times \underline{\quad} = 4$$

$$2 \times \underline{\quad} = 18$$

$$2 \times \underline{\quad} = 8$$

$$\underline{\quad} \times 6 = 12$$

$$\underline{\quad} \times 7 = 63$$

$$\underline{\quad} \times 5 = 30$$

$$\underline{\quad} \times 8 = 64$$

$$\underline{\quad} \times 8 = 64$$

$$3 \times \underline{\quad} = 27$$
