

Ecuaciones con Números que Faltan (C)

¿Qué valor representa cada figura?

$$14 + \nabla = 33 \quad 40 \div \diamondsuit = 20 \quad \Delta + 3 = 14 \quad \diamond \div 3 = 3$$

$$121 \div \mathbb{X} = 11 \quad 17 \times \spadesuit = 187 \quad \blacksquare - 9 = 13 \quad 13 + \Delta = 29$$

$$10 \times \mathbb{X} = 140 \quad \blacksquare + 4 = 12 \quad 56 \div \odot = 14 \quad 14 + \bullet = 31$$

$$\bullet + 2 = 15 \quad 28 - \diamond = 13 \quad 12 \times \Delta = 216 \quad 12 \times \mathbb{X} = 192$$

$$\blacksquare \times 12 = 168 \quad \square - 6 = 6 \quad 75 \div \nabla = 15 \quad \square + 13 = 24$$

$$16 \times \blacksquare = 16 \quad 25 - \blacksquare = 12 \quad \square \times 6 = 42 \quad 12 \times \diamond = 216$$

$$\ast \times 6 = 36 \quad \star + 1 = 10 \quad \diamond + 8 = 10 \quad \square - 2 = 14$$

$$\blacksquare \times 8 = 144 \quad 7 \times \Delta = 105 \quad \mathbb{X} \times 18 = 54 \quad 1 + \square = 14$$

$$266 \div \blacksquare = 19 \quad \blacksquare \times 18 = 18 \quad 16 - \square = 14 \quad \bullet + 4 = 12$$

$$18 \times \diamond = 126 \quad 11 \times \square = 110 \quad \ast \times 10 = 120 \quad 6 - \mathbb{X} = 4$$
