

# Graficar Sistemas Lineales (E)

Grafique cada sistema lineal y halle su solución.

1.  $x + y = 4$   
 $y = -\frac{7}{8}x + 3$

Solución: (----,----)

2.  $y = -3x + 1$   
 $y = -11x - 7$

Solución: (----,----)

3.  $6x - 7y = -7$   
 $y = \frac{1}{7}x + 6$

Solución: (----,----)

4.  $y = -\frac{1}{7}x - 5$   
 $6x - 7y = -14$

Solución: (----,----)

# Graficar Sistemas Lineales (E) Respuestas

Grafique cada sistema lineal y halle su solución.

1.  $x + y = 4$   
 $y = -\frac{7}{8}x + 3$

Solución: (8,-4)

2.  $y = -3x + 1$   
 $y = -11x - 7$

Solución: (-1,4)

3.  $6x - 7y = -7$   
 $y = \frac{1}{7}x + 6$

Solución: (7,7)

4.  $y = -\frac{1}{7}x - 5$   
 $6x - 7y = -14$

Solución: (-7,-4)
