

Graficar Sistemas Lineales (E)

Grafique cada sistema lineal y halle su solución.

1. $x + y = 4$
 $y = -\frac{7}{8}x + 3$

Solución: (----,----)

2. $y = -3x + 1$
 $y = -11x - 7$

Solución: (----,----)

3. $6x - 7y = -7$
 $y = \frac{1}{7}x + 6$

Solución: (----,----)

4. $y = -\frac{1}{7}x - 5$
 $6x - 7y = -14$

Solución: (----,----)
