

# Graficar Sistemas Lineales (G)

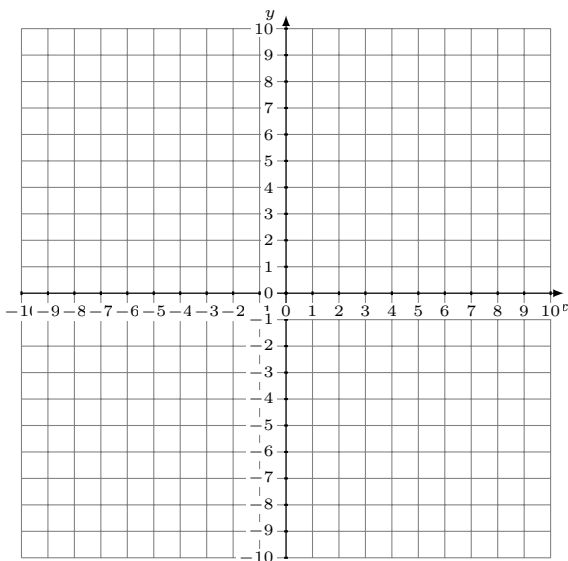

Grafique cada sistema lineal y halle su solución.

1.  $4x + 3y = 21$   
 $y = -\frac{10}{9}x + 5$

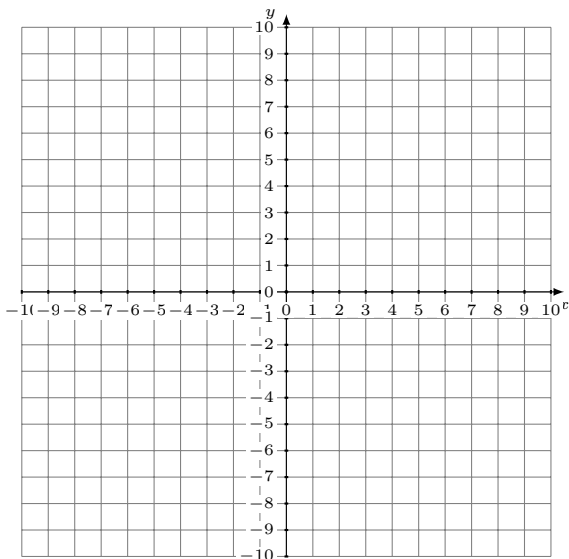

Solución: (----,----)

2.  $y = -8$   
 $13x + 2y = 10$

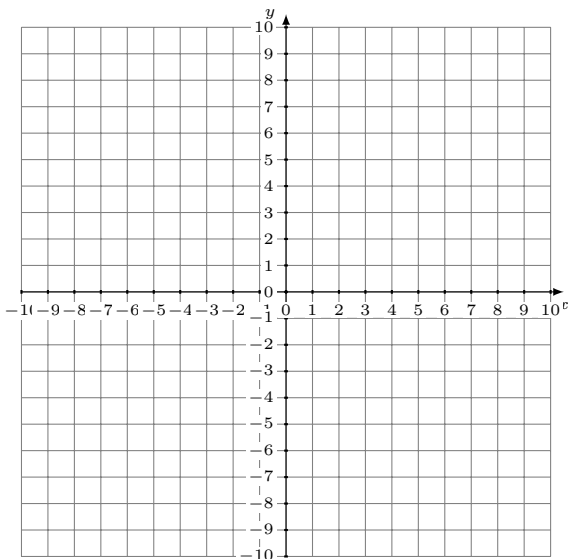

Solución: (----,----)

3.  $2x - y = 2$   
 $10x - y = -6$

Solución: (----,----)

4.  $6x - 5y = 40$   
 $4x - 5y = 30$

Solución: (----,----)

# Graficar Sistemas Lineales (G) Respuestas

Grafique cada sistema lineal y halle su solución.

1.  $4x + 3y = 21$   
 $y = -\frac{10}{9}x + 5$

Solución: (9,-5)

2.  $y = -8$   
 $13x + 2y = 10$

Solución: (2,-8)

3.  $2x - y = 2$   
 $10x - y = -6$

Solución: (-1,-4)

4.  $6x - 5y = 40$   
 $4x - 5y = 30$

Solución: (5,-2)
