

Función Seno (E)

Nombre: _____

Fecha: _____

Calcule los valores de los ángulos usando la función seno: $\text{sen}(\alpha) = \frac{C.O.}{H}$

$$\alpha = \angle XZY = \underline{\hspace{2cm}}$$

$$\beta = \angle GHJ = \underline{\hspace{2cm}}$$

$$\theta = \angle ABC = \underline{\hspace{2cm}}$$

$$\varepsilon = \angle KNM = \underline{\hspace{2cm}}$$

Función Seno (E) Respuestas

Nombre: _____

Calcule los valores de los ángulos usando la función seno: $\text{sen}(\alpha) = \frac{C.O.}{H}$

$$\alpha = \angle XZY = \underline{57.8^\circ}$$

$$\beta = \angle GHJ = \underline{33.7^\circ}$$

$$\theta = \angle ABC = \underline{64.6^\circ}$$

$$\epsilon = \angle KNM = \underline{34.5^\circ}$$
