

## Orden de Operaciones (I)

Realice las operaciones en el orden correcto.

1.  $4^{6 \div 3} - 2 \times 7 \div 2$

6.  $(3 \div 3)^{(1^5 + 4)} \times 1$

2.  $(7 - 2^2) \div (2 - (8 - 7))$

7.  $7 - 2 \div 2 - 4^{9 \div 9}$

3.  $(2 \times (6 \div 6)^{8 \div 1})^4$

8.  $8 \times 7 \div 7 + 9 - 1 - 3$

4.  $1 \div (4 \div 2 \div 2) + 7 - 1$

9.  $(2 - 2) \div (8 - 1 \times (5 - 4))$

5.  $6 \div (5 \div 5 + 3 - (5 - 4))$

10.  $(9 \div 9 + 8 \div 8) \times 3 \div 3$

## Orden de Operaciones (I) Respuestas

Realice las operaciones en el orden correcto.

$$1. 4^{6 \div 3} - 2 \times 7 \div 2 \\ = 9$$

$$6. (3 \div 3)^{(1^5 + 4) \times 1} \\ = 1$$

$$2. (7 - 2^2) \div (2 - (8 - 7)) \\ = 3$$

$$7. 7 - 2 \div 2 - 4^{9 \div 9} \\ = 2$$

$$3. (2 \times (6 \div 6)^{8 \div 1})^4 \\ = 16$$

$$8. 8 \times 7 \div 7 + 9 - 1 - 3 \\ = 13$$

$$4. 1 \div (4 \div 2 \div 2) + 7 - 1 \\ = 7$$

$$9. (2 - 2) \div (8 - 1 \times (5 - 4)) \\ = 0$$

$$5. 6 \div (5 \div 5 + 3 - (5 - 4)) \\ = 2$$

$$10. (9 \div 9 + 8 \div 8) \times 3 \div 3 \\ = 2$$
