

# Notación Científica (B)

Convierta cada número ordinario a notación científica.

$$717,000 = 28,800 =$$

$$7,090 = 0.0000007809 =$$

$$0.00000529 = 880,000,000 =$$

$$28,400,000 = 0.000000047 =$$

$$0.0000003338 = 9,458,000 =$$

$$830,000,000 = 65,060,000 =$$

$$4,690 = 0.0000348 =$$

$$890,000,000 = 0.00417 =$$

$$0.000000099 = 0.00073 =$$

$$4,977 = 0.000000012 =$$

## Notación Científica (B) Respuestas

Convierta cada número ordinario a notación científica.

$$717,000 = 7.17 \times 10^5 \qquad 28,800 = 2.88 \times 10^4$$

$$7,090 = 7.09 \times 10^3 \qquad 0.0000007809 = 7.809 \times 10^{-7}$$

$$0.00000529 = 5.29 \times 10^{-6} \qquad 880,000,000 = 8.8 \times 10^8$$

$$28,400,000 = 2.84 \times 10^7 \qquad 0.000000047 = 4.7 \times 10^{-8}$$

$$0.0000003338 = 3.338 \times 10^{-7} \qquad 9,458,000 = 9.458 \times 10^6$$

$$830,000,000 = 8.3 \times 10^8 \qquad 65,060,000 = 6.506 \times 10^7$$

$$4,690 = 4.69 \times 10^3 \qquad 0.0000348 = 3.48 \times 10^{-5}$$

$$890,000,000 = 8.9 \times 10^8 \qquad 0.00417 = 4.17 \times 10^{-3}$$

$$0.000000099 = 9.9 \times 10^{-8} \qquad 0.00073 = 7.3 \times 10^{-4}$$

$$4,977 = 4.977 \times 10^3 \qquad 0.000000012 = 1.2 \times 10^{-8}$$
