

# Notación Científica (E)

Convierta cada número ordinario a notación científica.

$$620,000,000 = 4,700 =$$

$$0.0006031 = 10,200,000 =$$

$$102,900 = 6,250 =$$

$$0.000000084 = 5,400,000 =$$

$$11,800 = 95,860,000 =$$

$$0.00002489 = 0.0000979 =$$

$$35,000 = 0.00000079 =$$

$$0.0000084 = 4,390 =$$

$$33,180,000 = 0.0035 =$$

$$6,900,000 = 52,000,000 =$$

## Notación Científica (E) Respuestas

Convierta cada número ordinario a notación científica.

$$620,000,000 = 6.2 \times 10^8 \qquad 4,700 = 4.7 \times 10^3$$

$$0.0006031 = 6.031 \times 10^{-4} \qquad 10,200,000 = 1.02 \times 10^7$$

$$102,900 = 1.029 \times 10^5 \qquad 6,250 = 6.25 \times 10^3$$

$$0.000000084 = 8.4 \times 10^{-8} \qquad 5,400,000 = 5.4 \times 10^6$$

$$11,800 = 1.18 \times 10^4 \qquad 95,860,000 = 9.586 \times 10^7$$

$$0.00002489 = 2.489 \times 10^{-5} \qquad 0.0000979 = 9.79 \times 10^{-5}$$

$$35,000 = 3.5 \times 10^4 \qquad 0.00000079 = 7.9 \times 10^{-7}$$

$$0.0000084 = 8.4 \times 10^{-6} \qquad 4,390 = 4.39 \times 10^3$$

$$33,180,000 = 3.318 \times 10^7 \qquad 0.0035 = 3.5 \times 10^{-3}$$

$$6,900,000 = 6.9 \times 10^6 \qquad 52,000,000 = 5.2 \times 10^7$$
