# Notación Científica (I) Respuestas

Convierta cada número ordinario a notación científica.

$$0.0000283 = 2.83 \times 10^{-5} \quad 0.0000866 = 8.66 \times 10^{-5}$$

$$0.00005238 = 5.238 \times 10^{-5} \quad 0.00981 = 9.81 \times 10^{-3}$$

$$780,000,000 = 7.8 \times 10^8 \quad 967,000,000 = 9.67 \times 10^8$$

$$4,500 = 4.5 \times 10^3 \quad 0.00785 = 7.85 \times 10^{-3}$$

$$0.00000018 = 1.8 \times 10^{-7} \quad 0.000618 = 6.18 \times 10^{-4}$$

$$823,000,000 = 8.23 \times 10^8 \quad 646,600,000 = 6.466 \times 10^8$$

$$1,700 = 1.7 \times 10^3 \quad 0.000039 = 3.9 \times 10^{-5}$$

$$0.0000000209 = 2.09 \times 10^{-8} \quad 0.00007 = 7 \times 10^{-5}$$

$$23,050,000 = 2.305 \times 10^7 \quad 0.000566 = 5.66 \times 10^{-4}$$

$$0.0091 = 9.1 \times 10^{-3} \quad 0.00000618 = 6.18 \times 10^{-6}$$
